	LATOSHA HINES	1797	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Disposition of Claims

4) Claim(s) 1-8 is/are pending in the application.

4a) Of the above claim(s) _____ is/are withdrawn from consideration.

5) Claim(s) _____ is/are allowed.

6) Claim(s) 1-8 is/are rejected.

7) Claim(s) _____ is/are objected to.

8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

9) The specification is objected to by the Examiner.

10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.

Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) All b) Some * c) None of:
1. Certified copies of the priority documents have been received.
2. Certified copies of the priority documents have been received in Application No. _____.
3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

1) Notice of References Cited (PTO-892)
2) Notice of Draftsperson's Patent Drawing Review (PTO-948)
3) Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date _____
4) Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
5) Notice of Informal Patent Application
6) Other: _____

DETAILED ACTION

1. This is the second Office action based on the 10/585,931 application filed on July 13, 2006. The rejection of claims 1-4 under 35 USC 102(b) as being anticipated by Barclay et al (4,451,266) made in the previous office action is withdrawn in view of applicant's amendments and remarks.
2. Claims 1-8 are pending and have been fully considered in which claims 5-8 are new.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over GROF et al. (US 2004/0248307).

GROF et al. discloses a system and a method for controlling the amount of a marker added to an unmarked fluid, such that a selected marker concentration in the fluid is obtained. Suitable fluids include petroleum products such as crude oil, naphtha, gasoline, diesel fuel, kerosene, etc. Furthermore, a combination of a plurality of markers can be added to the unmarked fluid, each at a selected concentration (paragraph 0025). According to another example the marker can be a halogenic compound, such as an alkyl halide having the general formula:

"X" is a halogen such as fluorine (F), chlorine (Cl), bromine (Br), and iodine (I).

An example of such an alkyl halide is tetrabromoethane (paragraph 0031).

In independent method claim 1, applicant uses open-ended claim language "comprising" which allows for the addition of other additives such as those taught in the reference but not by applicant. Markers are added to fuels in very, very small amounts to mark or tag the specific fuel so if one of ordinary skill in the art tries to steal the fuel it can be identified. It is well known in the art markers are essentially invisible and are not detectable unless a specific test is made for them. Applicant's invention differs in method claim 1 by using the alkyl halide as a fuel additive to a fuel *to increase completeness of combustion of the fuel* which is not taught by GROF. However, fuel markers are additives to fuels, and since it is not clear from the claims or from applicant's specification how much of the alkyl halide is need to increase the completeness of combustion of the fuel, the examiner is of the position that the amount of alkyl halide added by GROF to mark the fuel is sufficient to increase the completeness of combustion of the fuel. Unless demonstrated otherwise, the examiner is of the position that the relative claim language to "increase" the completeness of combustion of the fuel does not patentably distinguish the claims over the prior art to GROF.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LATOSHA HINES whose telephone number is 571-270-

5551. The examiner can normally be reached on Monday thru Thursday from 8 a.m. to 5 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Calderola can be reached on 571-272-1444. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
